

FEATURE BASED REVIEW SUMMARISATION AND RANKING

This project is a web application that analyses and summarizes benefits and drawbacks of an Amazon product based on user reviews.

REQUIREMENTS

This project uses Meteor 1.8 and the following npm packages:

- ❖ Emotional
- ❖ En-pos
- ❖ React
- ❖ Vo

See package.json for versions and required npm packages.

GETTING STARTED

This app requires you to have Meteor installed on your machine. Then run the following commands:

```
meteor npm install
```

```
meteor run
```

SUMMARISATION

An Amazon product page should be given as input to the web application. A minimum of 100 reviews are recommended for accurate summarization.
